A Clinical Trial for Patients with Moderately to Severely Active Ulcerative Colitis

VTX002-201 is a clinical trial for patients with moderately to severely active Ulcerative Colitis. The goal of this trial is to evaluate the safety and efficacy of an investigational study drug.

The investigational study drug (VTX002) in this study is:

- taken orally in a tablet form, and
- is tested in people who have not responded well to conventional treatment, like corticosteroids, or biologics.

To learn more about the VTX002-201 study, please contact the site staff below, and they can help determine your eligibility.
